Education

MCS(Master of Computer science)   2020-2022
The Islamia University of Bahawalpur
CGPA:3.2/4.00

Work experience

Internship   **22-3-2022**
Smart Developer:I was completed my probation here,and I
created some project using html css and javascript for frontend
php and node js for backend,i worked on admin dashboard and
responsive webpage and handling form submition,here I worked
six months ,during this I created many project like web based
I learned very advance technology ,which is raised in world
here I learn both the basic and advance skills like code
optimization code readability and much more.

Fornt-End Developer

Kodex-Technology React-native Developer   **20-6-2022**

I Build pixel-perfect, buttery smooth UIs across both mobile
platforms.Leverage native APIs for deep integrations with
both platforms.Diagnose and fix the bugs and performance
bottlenecks for performance that feels native.Maintain code
and write automated tests to ensure the product is of the
highest quality.each indivisul component with code optimization
and more readablity,every person can understand the code to
modify it,i use the most beautiful ui framwork like that material
for android and macos theams for ios.

Beacon Group of Company

Mern Stack Developer   **20-6-2022**

here I am currently working as fullstack developer.
i am working as react-native mobile application
developer for both android and ios ,and I also
working as react-native and mern stack developer
and I also using both databases like sql and nosql
both are very important for fast apis call,i am working
on all functioinality which is very neccessry for moth
mobile and web development.and I also costmize the existing
project both web and ios like change with modern ui with some
extra functionality.

Skills

Front-End
ReactJS | NextJS
HTML | CSS
SCSS
Redux | React Hooks
JavaScript | Jquery
React-Query

Mobile Application
React Native
React Native Web
Flutter Development
Both Android and Ios

Design System
Material-ui | Bootstrap
ReactStrap | React-Bootstrap
TailwindCSS

Back-End
Python
Framework
NodeJs | ExpressJs | JWT
auth | GraphQL
Apollo | Laravel | PHP

Databases
SQL
Mysql | Maria db

NoSQL
Firebase | Strapi
Mongodb

Data Science
Python Libraries
Numpy | scipy
Sciketlearn | pandas
Matplotlib

Project-1

E-commerce
It is mern stack project ,in this project i created rest apis using
node js express and mongodb api is used to register the new user and
login user and to secure the route of auth api i used the web token library
and the other apis is used to add product to the database read product from
the database and edit and delete product to the database,only admin can perform
these all oprations,this is the part of our backend.to the frontend i used the
reract js which is javascript library not a framework,in this part i created the
different pages and routes for navigate one page to another page,for routing i used
the react router dom,when the costomer will come on my website first of all he/she
register and login befour perchasing the product ,i created the register and login
form sepratly and after login user can perchase the any product with stripe payment
method.the technology which i used in this project like react and code optimization.

Projects-2
Social-Media
Social media Application Social media is a chat management system (like
Facebook.com). It provides a platform for its users can share post like
and dislike post. It is also a decision- making system to cell and
perchase product. A person can compare two or more social compaign, see
reviews and ratings of a post given by different users, ask a question
about the different post. A user can also chat with the same post
users. This system is built by using ReactJs, Redux, Firebase (For chat and
notifications), MongoDB,NodeJS, ExpressJS, GraphQL, and REST Apis. (Currently,
i am working on this project)
