lahore Pakistan

Front-End Developer (currently working here)

Skills: Leadership · Coaching · Software Development.Next.js.React.js React-Redux,GraphQl,Apllo-Client.React-Query and Nestjs with Rest Apis and GraphQl apis.

Working on
- Building microservices with **Nestjs**
- Building features for AI Dashbord using Next.js, React, GraphQL
- Creating and managing data pipeline jobs and updating reporting tables with Beams
- Transitioning Postmates merchant reporting into AI Beams dashboard

Kodex-Technology

Full-Time 1 yr 4 mos

Full-Stack Developer
Feb 2020-Feb 2021

Skill: Software Architecture · Software Design · Python·Nestjs.Javascript

Work on
- Design, implement and test software (Nestjs, Scala, Python/Django Elixir, React, GraphQL) for the Seller & Buyer teams.
- Standup, service, and maintain infrastructure with Google Cloud Platform and Kubernetes.
- Build useful monitoring/instrumentation/messaging tools with BigQuery Prometheus, mParticle, and Braze.

Skills

Front-End
ReactJS | NextJS
HTML | CSS |GraphQL
SCSS
Redux | React Hooks
JavaScript | Jquery
React-Query

Mobile Application
React Native
React Native Web
Flutter Development
Both Android and Ios

Design System
Material-ui | Bootstrap
ReactStrap | React-Bootstrap
TailwindCSS

Back-End
Python
Framework
NodeJs | ExpressJs | JWT
auth | GraphQL |Nestjs
Apollo | Laravel | PHP

Databases
SQL
Mysql | Maria db

NoSQL
Firebase | Mongodb

Data Science
Python Libraries
Numpy | scipy
Sciketlearn | pandas
Matplotlib

- Use Google Dataflow and Apache BEAM to build data pipelines.
- Champion open source initiatives and internal hackathons.

PenANDweb.Inc
Part-Time 6 mos

Front-End Developer
Mar 2021- Aug 2021
Lhr Dha Phase-vI

Skill: Software Architecture · Software Design · Python · Javascript. MernStack

- Building Frontend with React.js and graphql Apllo-Client.
- Make beautifull dashbord using owesome UI framwork .
- Building smart contract dapps and web3.0
- Create crytpto voilet using eitherium blockchain.

Full-stack

Ecoby:I Build pixel-perfect, buttery smooth UIs across both mobile platforms.
- Building APIs for deep integrations with **graphqL** and **Rest** apis.
- both platforms.Diagnose and fix the bugs and performance increase.
- bottlenecks for performance that feels native.Maintain code and write automated
  tests to ensure the product .
- highest quality.each indivisul component with code optimization and more readablity
  every person can understand the code .
- modify it,i use the most beautiful ui framework for user better understading.

Smart.io

Full-stack
2019-2020

Skill: Fullstack Next.js ·Typescript.grapgQL.Tailwind css.Nestjs
Work on
Fabico.org:

- Building API GraphQL with Nestjs.
- Building Prisma with typeorm (object relation mapping) next generation node js.
- Deep nest flow to increas api perfomence.
- Building orm schema with auto nest/cli.

Feature
Fabico is Fullstack next generation social media application.this application is easy to use for
everyone,any person can use each and every feature of fabico.it is most demanded and accessable
for everyone,high performance code readablity maintainability and code optimization.user can access this
application after register on this applicatrioin,after login user can create chat send meadia file and other
media feature and much more like that video and audio call and daemon to the ext person.auto detect the
mutial friends for every person.it is very secure and for next time.
